

KS5**Course resources**

	<p><u>AS and A-level Psychology: AQA complete revision and practise</u> Clearly lays out everything you need to know across AS and A2 in its most basic form. Also includes quick low mark questions for small bursts of revision.</p>
	<p><u>Pearson revise AQA revision guide and workbook.</u> Explains everything from both AS and A2 in a clear format with added exam questions after modules. With this book you also receive a free online version which is great for access and revision</p>
	<p><u>Psychology Year 1: The complete companion student book for AQA</u> Loaded with information and in-depth studies for year 1 (AS). Within the same range there is also a workbook and revision guide.</p>
	<p><u>Psychology year 2: The complete companion student book for AQA.</u> Same as above, loaded with in-depth studies and information for A2. Helps to break down the modules and there is also a revision guide and work booklet within the range</p>
	<p><u>Oxford AQA Psychology Year 1</u> Specifically designed for the AQA specification, the Oxford collection goes into detail about the different modules and presents any key studies needed.</p>

	<p>Oxford AQA Psychology Year 2 Same as above: specifically designed for the specification however the A2 one covers all modules needed for A2 so not all of the book is covered in lessons.</p>
<p><u>Reading around the subject</u></p>	
	<p><u>Elephants on acid and other bizarre experiments: By Alex Boese</u> There are loads of bizarre and interesting experiments packed into this book including: <i>If left to their own babies would babies instinctively choose a well-balanced diet?</i> Perfect for those who want to look into the weird and wonderful side of psychology.</p>
	<p><u>Remember who you are: By David Vaughan Icke.</u> Connecting the dots between unconnected people, subjects and world events. A book for lovers of conspiracy theories and for those who like to seek the mystery in the world.</p>
	<p><u>The bell jar: By Sylvia Plath</u> A look into the true effects of mental illness and the struggles people can face whilst dealing with depression. Highly witty, readable and disturbing. A book for people who want to delve into the mind of a woman who society deemed as mad.</p>
	<p><u>The idiot brain: By Dean Burnett.</u> An entertaining tour into our brains and why we may do certain things. A book for anyone who has wondering why their brain sabotages their life and what an earth it is really up to.</p>

	<p><u>In a dark, dark wood: By Ruth Ware</u></p> <p>Sometimes the only thing to fear is yourself. A gripping and tense thriller surrounding the psychological nature of a party gone wrong in the woods. Not everything is what it seems.</p>
	<p><u>Room: By Emma Donoghue.</u></p> <p>A mother's love knows no bounds. In this compelling story of a mother and her soon, room offers the reader a heart-breaking story of captivity and escape and the psychological aspects that come with it.</p>
	<p><u>Curious incident of the dog in the night time:</u> <u>By Mark Haddon</u></p> <p>The world can be a scary place for someone with Asperger's. Follow this witty story of a boy whose world is suddenly full of mystery and who uses his curious personality to solve it.</p>
	<p><u>It's a kind of funny story: By Ned Vizzini</u></p> <p>Based on his own hospitalisation, this story takes a look into how depression can affect the world around you. Once you've read this story be sure to look up ed Vizzini to add an extra element of realism to the story.</p>
